

WI-FI DESIGNER

Predictive Design

for Jeferson Jeanpiere Martel Caballero

DATE: 20 JUN 2026

TIME: 07:00 PM (UTC)

Dear Jeferson,

Thank you for using Wi-Fi Designer-Cloud to design your wireless network!

Planning is a critical aspect of implementing wireless LANs that deliver a superior user experience. Determining the number and placement of access points (APs) is essential for providing the right coverage and capacity for your wireless network. This document contains the essential information about the network you designed using Cambium Networks access points.

Each page of this document contains one map that shows the placement of the APs on your floorplan(s) and the resulting predictive heat map. Below each map is an AP Quantities that lists of all the APs by model that were used in the design for that specific floor plan. At the end of the document, we provide an AP Quantities Summary that lists all the APs used across all your maps.

We hope you found Wi-Fi Designer valuable in planning your wireless network and look forward to working with you to address your wireless networking needs.

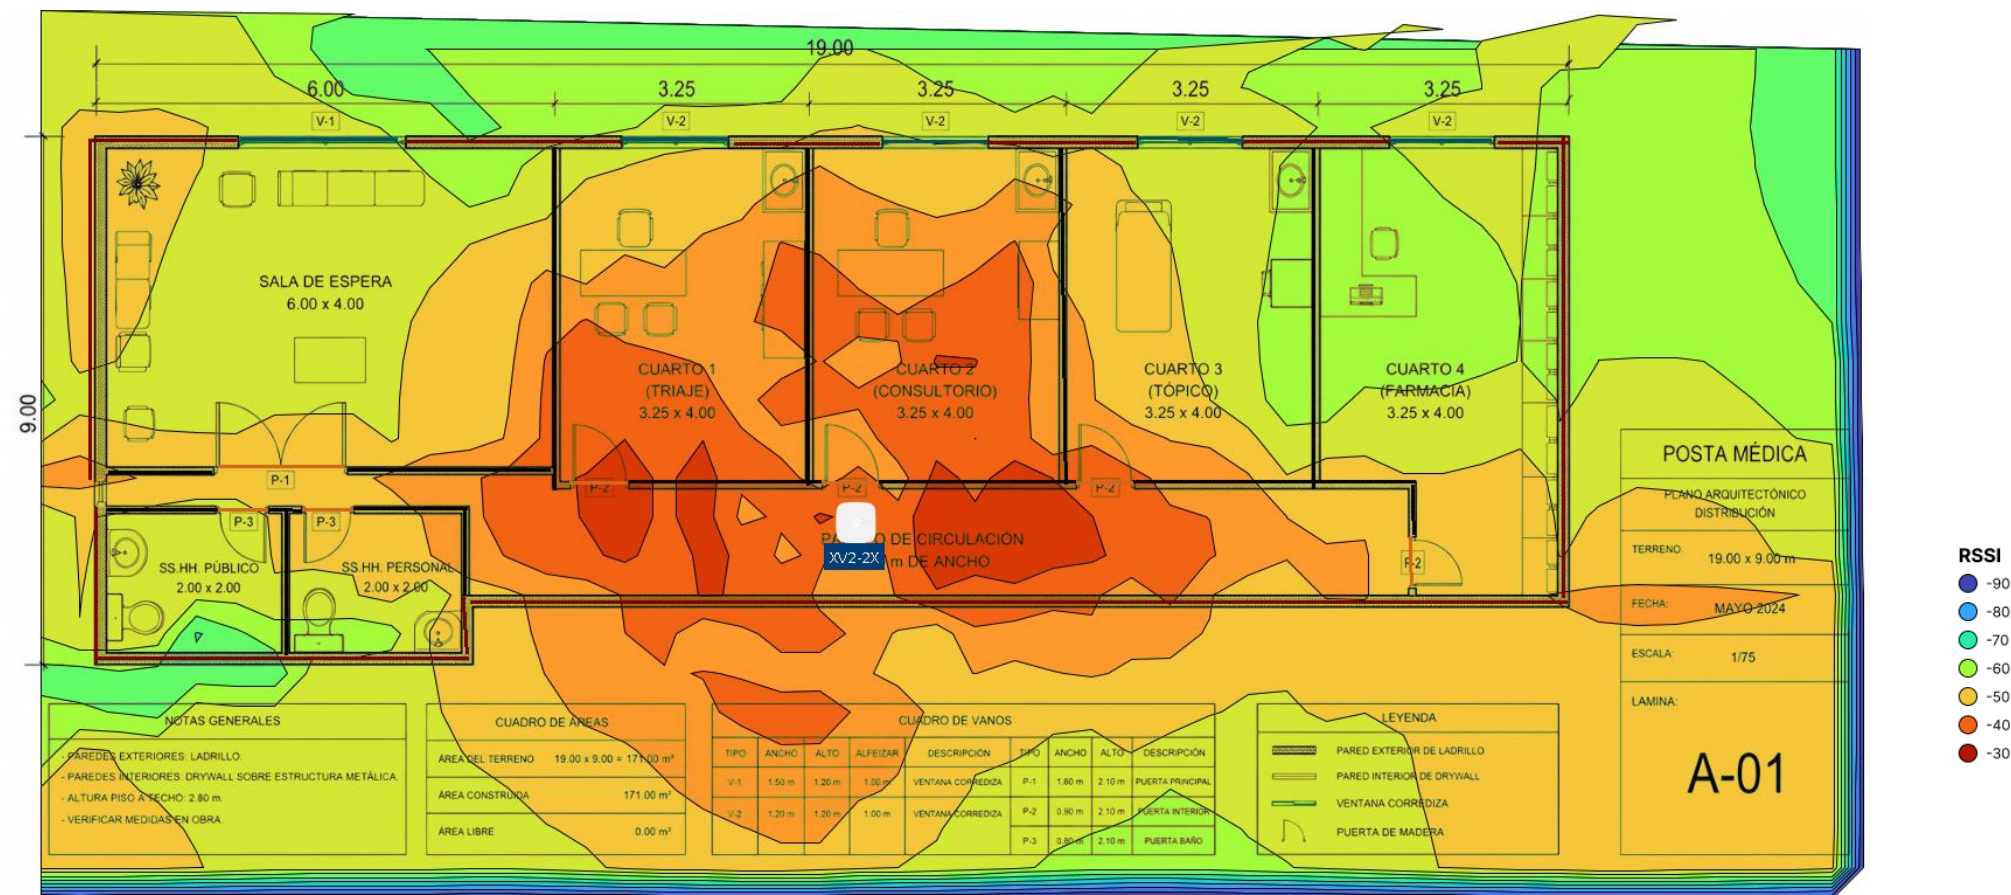

For questions about your design or more information, please use the Contact Form at cambiumnetworks.com or call 1-888-863-5250.

For questions about Cambium Network solutions, please email salesdev@cambiumnetworks.com or call 1-888-863-5250.
